HAVE YOU REALIZED YET HOW AND WHY THIS COURSE OF EVENTS HAS BEEN PRESENTED TO YOU IN THIS SLOW AND AGONIZING TWO PERSON MANNER FROM OVER A PERIOD OF 800* YEARS? PLUS THE NINE YEARS ALLAN WEBBER PUT IN, BRAVELY HANDING HIS REINS TO ME IN 2008?

EVEN NOSTRADAMUS HIMSELF QUERIED THE IMPORTANCE OF HIS WORKS RELATING TO EIGHT CENTURIES INTO HIS FAR OFF FUTURE! THE PLAN LAID OUT BY THE GALACTIC ELOIM ALLIANCES TO CARRY A TEST OF THIS NATURE WEAVING THROUGH THE WEFT OF TIMELINES HAD TO HAVE HAD A REASON. THIS WAS MY THINKING THAT RESULTED IN THE PDF FORUM **WHAT ARE THE CHANCES? ANY OTHER IDEAS?**

*800 years = 1349 (2025) back to 1547 – the year Nostradamus returned from the Levant; ^{1: 40: 3} fathered Filippo in Italy; and the early beginning of his works which followed in earnest...he who complained about the 800 year gap.

Not here to preach, just merely showing what is in the skies. The next event to take place after this, is the great earthquake, sun going dark, and the moon not giving its light, and the asteroid shower.

This is where Nibiru comes in with the asteroid tail.

I don't know when this is going to take place, I just know that the sun is still sitting in Virgo and this has never ever happened before.

I posted video and images to show the sun is setting in Virgo and should be in Scorpio.

WHY HASN'T THE SUN LEFT VIRGO?

Da Vinci:

INTRUSION IS NOT AMIABLE see 8 10 2 DANGLE IN AIR without their space ships, in their suits in Wisconsin

EXCEPT

Yesterday, October 30, 2023, I was told the USS FORD naval ship, is situated in the Mediterranean, complete with "new technology": the directed energy field tools. Hardly new, when it appeared in one of Arnie Schwarzenegger 2008 movies, shown in all its sasar glory. If the asteroid/s are AIMED as these texts have never stopped warning, and only nasa would be involved in that because of what runs them, the S.S. – and because of the images by NASA which is a form of Ritual Mocking they publish... then it tells us that the "USSFord" is not the enemy. That it has a job to do, which it is capable of doing with the Medusine Device, (the D.M.) the Sasar D.E.F. tool. One good excuse for it being in the arena is the ongoing Gaza problem. If you hear Putin has died – keep this in mind, he does have access to medbeds. Not only those, but access to Space Programs with technology same as the "20 and back" including its rejuvenation technology. IF Putin is being stopped from accessing these, he is a captive. That would make him in collusion with Trump – against the intruders of September 2017.

He did have a small complaint in my presence** regarding the great gap* in time between his j555 and the times of ArmMargEddan: We are in 1348/9 at "2024" (an invented date) and that makes the "gap" between j555 (first publication of Centuries) to now, ca. 794 years. The words 'My Verdun' relate to a very long drawn out battle at Verdun between the Imperial Oppressors and the locals. The locals won against the "Great Might" empire.

*So the docteur is comparing the "Dedipus Enemy" (Marduk) to the "great might" of Imperialism. Indeed, Imperialism IS the House of Anu.
 **The first occasion of my knowing I was on board a moonship is hazy. Sickening. But the comment regarding the great [800] year gap is also mentioned in one of the Latin correspondences. The other occasion of being in a moon-ship with very clear memory was that of repairs to brain ganglion, ^{2:390} when Da Vinci had asked to meet "Nella; who found my cues?". Let's be clear: Ukraine did not attack Russia with US ATACMS missiles yesterday.
* The ATACMS missile system requires periodic course correction and continual inflight monitoring, inputted by manual operators w/ US NAT SEC access codes. Does anyone think we are just giving these codes to UKR?
* The ATACMS uses geospatial and weather monitoring technology to self-regulate during its flight time, including minor flight-path alterations, orientation changes, altitude changes, etc. This requires the missile system to maintain a continuous uplink to US targeting systems, and NATO satellite-based guidance and recon systems.
* The ATACMS launch procedure requires the entry of classified US missile launch codes. Again, does anyone think the US is just going to give these codes to Ukrainian operators, in the middle of a war zone, w/ Russian military intelligence monitoring every byte of data in or out of the area?
Ukraine did not attack Russia last night.

¹ 800 years ago. Meaning 1348 minus 800 = 548 the year Filippo was born.

There are many coincidences that measure ca800. It is recommended that this period be taken from before 1348/9 and not 2024

The Tulli Papyrus 1486 BCE Winged Aten orbit had been 1506 BC to 706 BC = 800. Great Year

706 BC. Winged Disc Hezekiah coin (ROME repair to CRUCIFIXION and Pompeii) to 1 anno domo (j80) ca 786 years. The actual impact felt is the date named (706 BCE) but the lead up to that impact can be decades, as we have seen for ourselves with 2 suns in our own skies since 2010.

Celumbo returns 499.. From 499 to now 1349 is at least 800 years that North America has of unknown mystery history.

Vatican is "800 years" old. Using 2024 less 800 = 1224 a.d. seems an awful long time from crucifixion for them to get religious.

Let's go from 1349 minus 800 = ca.550 a.d. which actually is the timing for the Inquisition, and the adding of "domini" to "anno".

However - the significant date of "800" years backwards from now, 1348/2024 is around 548. The significant event in common remains the two years with no sun from 536, with the Blue Kachina most likely culprit. See tapestry below, knowing how long it is seen.

Then there is a group of petrified penguins dated to ca. 800 years ago. And do you know what happened 812 years ago?

The Blue Kachina 536 + Anak Krakatoa episode, two years with no sun.

Using 1348/²⁰²⁴ minus j536 = 812 ago. An event that Heribert Illig had as j6j4 (i6i4) (thank you so much Arjan Kuiten) which Heribert was taking as anno domo, but we have been on the Julian timeline all the time. Even during Otto's fracas.

So Heribert needed to remove 79 from i6i4 to arrive at the end of iulus 535-6. The Anak Krakatoa event; his j6j4.

Plus his 911 event needs 79 removing too = C+F+i832 (I832). Of Krakatoa in 1883 & great flooding worldwide.

Thanks to googles' blanket policy of blurring image and pictorial information, and thanks to my own stupidity!

This is all I have in my files now of a Tapestry which I at first took to be the timing of Hastings. We can see a date of CCCC with something very blurred followed by a VI. We know the CCCC/400 was changed to CD/400 by 598.

Not being game enough to take Hastings any further back than 496 (a date another scholar thought derived from the zodiac in the border of Bayeux Tapestry), I took this to

be the Hastings event too. Having the same set of celestial bodies travelling the same direction. Yet it is not. This is the 536 event!

TAKING FROM 496 TO 536 THEN MORE YEARS TO LEAVE, just as now!

The hard drive I kept the original image along with its video title name on it, has died. So no finding the video title.

The best clues here show us the Blue Kachina and distant followers. A date that might be 496 along with Greco Roman architecture and an African Basenji dog in the uncropped part.

Why is this so important? As we already know, the Red Kachina (Nibiru) system has been known to our scientists since at least 1981, over 40 years now... and THAT has only been its ingress period!

So saying when Blue Kachina came in [around] 496, was that its ingress period culminating in the 535/6 event?

The Anak Krakatoa episode followed by two years with no sun... 812 years ago (1348 - 536 = 812)

EVERYTHING goes back to this one event. The "800 years ago" of the Vatican - a period they so happily lie about as being 800 from 2024, being 1,224 "A.D."

And do you know what this event was they introduced in "1,224"? **Believe it or not** - the Nativity!

Now, why would the "Religious" wait over 1200 years to introduce the Nativity? Well, it was not 1200 years.

For the same reason Albrecht Dürer "painted" Charlemagne in "1512", when he had been dead 984 years.

First, not being 2024, but being 1348, (incidentally, the same age as the Shroud of Turin), "800" years ago is in reality not the year 1,224, but around 548. So when I use the word "ago" as in "gone by", the actual announcement of "800 years ago" would have, and was, made sometime in the last 12 years (for some reason) - another coincidence - since the two suns were first seen in our skies.

Illig took day one of our calendar, the Julian calendar, to begin his calculations. The day of death was the beginning of anno domo. The date of crucifixion was followed by day one of the so called Christian calendar. Crucifixion was julian (iulus) 79 Making i80 as day 1 anno domo. ILLIG HAD A MYSTERY DATE OF j6j4 – an important date for some, because some town clocks began that date. Yes, a historical date indeed! But the date of death was our new calendar – so Illig needed to deduct 79 from julian.614. And that date is 535, the end of which saw the Blue Kachina Event, 2 years then with no sun This date can also be taken for the Vatican birth & Inquisition

BACKGROUND OF THE INVENTION

1. Field of the Invention
The invention relates to planispheres and refers more specifically to planisphere structure for accomplishing both astronomical and navigational calculations and displays. Specifically, the planisphere of the invention includes structure for and may be operated to provide either an overhead or a ground position display of heavenly bodies in both the northern and southern hemispheres at different longitudes and latitudes in a Copernican manner. Hour angle circle diagrams and navigator's time diagrams may be programmed on the planisphere of the invention which also provides structure for directly indicating altitude and azimuth of celestial bodies and navigation east and west scales to enable a correct conceptual approach to navigation problems. Information concerning stars useful in navigation is also obtainable from the structure of the planisphere of the invention.

2. Description of the Prior Art
In the past, structure for astronomical and navigational displays and calculations have generally been restricted to use in either astronomy or navigation. Further, the prior structures have usually been limited to use in a single hemisphere and to a predetermined latitude.

No prior devices for solving hour angle circle diagrams or providing time diagram information without mathematical computation with the ease and facility of the planisphere of the invention or which provide a conceptually correct approach to navigation problems by the use of both navigation east and west scales in prior navigational computations have sometimes incidentally used the Greenwich meridian as a starting point, in accordance with the present invention and in the present system, the use of the Greenwich meridian as a starting point is emphasized.

Wherein navigational star information has been provided before, it has usually been in the form of charts and lists rather than on a planisphere scale in combination with other navigational and astronomical information.

In particular, the star finder and identifier number H.O. 2102-D previously published by and obtainable from the U.S. Naval Oceanographic Office is limited in practical use to finding and identifying stars. It cannot function as a substitute for a time diagram since the

mean time scales necessary for that purpose are not available. Orienting the sky map for either hemisphere properly by directing the south meridian or the longitude position due south from the northern hemisphere standpoint and the north meridian due north in the southern hemisphere is the prime and only limited, practical purpose of H.O. 2102-D in the system of celestial navigation. Sight reduction according to present notions of time approximations of the nearest half-hour or so does not require accuracy with respect to azimuth and altitude even to the extent of the grid application by rough interpolation provided by H.O. 2102-D. In case accuracy is a requirement for sight reduction, Tables of Computed Altitude and Azimuth, published by U.S. Hydrographic Office Publications H.O. 214, is a quickly available and more satisfactory source to serve that purpose.

Also, it will be noted that H.O. 2102-D is discontinued with respect to the many parts of disassembled structure necessary to even its limited ultimate use, in contrast to the completely integrated, totally interrelated structure of the planisphere of the invention.

SUMMARY OF THE INVENTION

The planisphere structure of the present invention provides concentric, relatively rotatable, different diameter dials of progressively larger diameter from outer dials on both sides of a central dial to the central dial having both navigation and astronomy scales and diagrams thereon with which information, such as obtained from the usual hour angle circle and navigator's time diagram, may be obtained without mathematical computation and in a conceptually correct manner.

Interchangeable sky maps are provided on dials of the planisphere of the present invention for displaying heavenly bodies, such as stars, in both the northern and southern hemispheres in both a zenith or overhead configuration and a ground position configuration to facilitate either astronomical or navigational use of the planisphere in either hemisphere. In conjunction with the sky maps, transparent sky mask dials are provided having a plurality of horizon indicators thereon, whereby the planisphere may be used at different latitudes as well as in both the northern and southern hemispheres.

Greenwich dials which include an azimuthal equidistant projection of the northern and southern hemispheres thereon are provided between the sky map dials in a ground position configuration and the sky mask dials to aid in the Copernican understanding of the display of celestial bodies on a predetermined day at a selected time. The Greenwich dials are stored behind the sky map dials on the overhead side of the planisphere. In addition, navigation east and west scales are provided on radially outer dials which also have a Greenwich "G" indication thereon to facilitate correct conceptual operation of the planisphere of the invention.

Reference rules are provided extending radially outwardly from the center of the planisphere at which point they are pivotally mounted. The reference rules extend outwardly beyond the outer periphery of the largest diameter dial on both sides of the planisphere where they are connected. The reference rules aid in automatically aligning the various dials of the planisphere in use thereof. The automatic alignment of both sides of the planisphere on programming either side of the planisphere due to the planisphere structure pro-

vided and the two-sky configuration thereof is emphasized.

Optionally a reference indicator extending radially in both north and south directions from a central azimuth altitude circle is provided for navigational use with the planisphere. With the reference indicator center positioned over the assumed position of the navigator on the ground configuration sky map dials, the relative azimuth and altitude of celestial bodies displayed on the associated sky maps may be determined directly and navigational triangulation sight considerations are facilitated.

Transit scale indicators having a viewing window therein for viewing the scales on the larger diameter dials extend radially outwardly from the sky masks on both sides of the planisphere structure. The transit scale indicators are connected radially outwardly of the largest diameter dial. Similarly, Greenwich indicators are provided on the Greenwich dials and Aries indicators are provided on the sky map dials on both sides of the planisphere. The Greenwich and Aries indicators are also connected radially outwardly of the largest diameter dial. In the planisphere of the invention, the reference rules, transit scale indicators and Aries indicators are progressively shorter whereby the reference rules, transit scale indicators, and Aries indicators may readily pass through or over each other during programming of the planisphere.

Also the planisphere is color coded to be a different color on opposite sides to prevent use of the wrong dials together with the planisphere in either a single hemisphere or dual hemisphere configuration. The important stars are given a common identification number on the star maps and on ground position maps are individually named, while on overhead sky maps the constellations in which the stars appear are named.

Navigational star information is provided on one of the relatively rotatable dials in a ground position configuration for the principal navigational stars in one localization of the planisphere of the invention.

BRIEF DESCRIPTION OF THE DRAWINGS

FIG. 1 is a partial composite plan view of one side of a planisphere constructed in accordance with the invention for use with an assumed position in the northern hemisphere which has a ground position north sky map dial.

FIG. 2 is a partial section view of the planisphere illustrated in FIG. 1, taken substantially on the line 2-2 in FIG. 1.

FIG. 3 is an enlarged plan view of the one side of the planisphere of FIG. 1 with the sky mask dial, reference rule and Greenwich dial removed therefrom.

FIG. 4 is an enlarged plan view of the other side of the planisphere of the invention for use with an assumed position in the northern hemisphere similar to FIG. 3 which has an overhead north configuration and includes an overhead north sky map dial.

FIG. 5 is a partial plan view of the reverse side of the ground position north sky map illustrated in FIG. 3 showing the ground position south sky map.

FIG. 6 is a partial plan view of the reverse side of the overhead north sky map illustrated in FIG. 4 showing the overhead south sky map.

FIG. 7 is a plan view of the sky mask dial of the planisphere of FIG. 1.

FIG. 8 is a plan view of one of the Greenwich dials of the planisphere of FIG. 1 having a northern hemisphere polar azimuthal equidistant projection thereon.

FIG. 9 is a plan view of the reference rules of the planisphere of FIG. 1.

FIG. 10 is a plan view of an enlarged reference indicator for use with the planisphere of FIG. 1 including an azimuth-altitude circle in accordance with the invention.

FIG. 11 is a composite plan view of a modified planisphere, such as illustrated in FIG. 1 on which the navigation number, magnitude, and declination of selected stars are provided.

DESCRIPTION OF THE PREFERRED EMBODIMENT

The planisphere 12, as shown in FIG. 1, includes the navigation east and west central dial 14, the Greenwich mean time and star magic dial 16, a standard time dial 18, a local time dial 20, the Greenwich dial 22, the sky map dials 24 and sky mask dials 26. The planisphere 12 is completed with reference rules 28. Reference indicator 30, shown in FIG. 10, is also provided for use with the planisphere 12. The reference rules 28 are pivotally mounted concentrically with the dials 14, 16, 18, 20, 22, 24 and 26 of the planisphere 12, as illustrated in FIGS. 1 and 2. Dials 22, 24 and 26, as well as the reference rules 28, are provided on each side of the single central dial 14. In the embodiment of the invention shown in FIGS. 1 through 10, the dials 16, 18 and 20 are provided only on one side of the planisphere. The reference indicator or altitude and azimuth circle 30 is not mounted on planisphere 12, but may be centered on an observer's longitude and latitude at the assumed position of the navigator on the maps provided on the dial of the planisphere for use as will be seen subsequently.

As shown in FIG. 7, the sky mask dials 26 are constructed of clear plastic or some similar clear, form-retaining but flexible material for the most part and include a meridian angle scale 32 around the outer periphery thereof which is calibrated in hours and degrees in opposite directions from the meridian at "M" to the nadir meridian at "N". A plurality of horizon configurations 34 are provided on the sky mask dials 26 to delineate the horizon of an observer at different latitudes with respect to the sky maps 36 on the sky map dials 24. Thus, the planisphere 12 may be used at a plurality of different latitudes.

The sky mask dials 26 are further provided with transit scale indicator portions 38 extending radially outwardly from one edge thereof, as shown in FIG. 7. The transit scale indicators portions 38 have a clear viewing window 40 therein across which a meridian indicator 44 is placed and through which portions of the other dials may be viewed in operation of the planisphere 12. The scales on the dials 14, 16, 18, 20, 22 and 24 are designated on the transit scale indicator portions 38 of the sky mask dials 26.

The reference rules 28, as shown best in FIG. 9, include a reference indicator line 46 thereon and are also constructed of clear plastic.

The reference indicator or altitude and azimuth circle 30, as shown best in FIG. 10, is universal and includes a circular portion 39 and a generally linear portion 42. The circular portion 39 has azimuth scales 41 and 43 thereon extending respectively from zero to

As you have already noticed, Century & Quatrain Numbers, but by the TITLE of each Directive. It only made common sense to me to divide the Directives in alphabetical order as well, since many of you would be using a phone not having the C+F+ Control plus Find feature. It may at first appear that the terms of importance of a Directive becomes lost in the fabric woven by not placing them in an order of Importance. In the end, Importance is only opinion. The message gained and heeded is what counts

13 MONTH YEAR

1,349 @ 2025 CURRENT ERA AKA A° DOMO, ALSO MAKES THE SHROUD OF TURIN REAL

So far as timing for Year of the Dragon and Year of the Snake = Since October 2013 (Snake into Horse) the orbit has been 377.8 days. Beginning with October. For purposes of ease we will call that 378 days as the elliptical orbit year has a new 13 months calendar. Some call it "lunar". One year becomes another after 13 months orbit is completed. Notice I did not nominate which date would be the month end. The last detail which is handy to know. Our orbit is a spiral and never meets itself at any point. It does not encircle the sun. Our orbit spirals in Fibonacci sequence the same as all other orbits following our sun. None of our planets can overtake our suns linear course.

There are 246 mentions of the word PAIR in the Template Of Anagrammed Quatrains (the published quatrain) which after anagramming have become QUATREINS. The PAIRING of TOPICS being found in separate quatrains provides a more clear picture of the subject matter. There are intertwined links and this does include the website links, of which some are here under ENDNOTES.

Yes, quite so – this is the last guidance regarding how to find the words in the anagram machine – and you can compare the results shown between what the computer program produced as a template and what the final result is. Working down the results produced by the *Anagram Genius* program - using words as you come to them (like a “piano runs its notes”) quite so, and if a repeated word arrives, there is no need to use it again (but it can be put thru the *anagram genius* to see what else it might say). In fact, I am wondering why it has taken me nine years to realize that like *rune stone* reading, (the pre-cursor to our alpha-bets) that sentences of words are the same as rune reading ! One has the “issue” (either a problem, a name, or a subject topic) and in this work the topic is mostly a name but not always ; such as the word “Earth” – the letters comprising that name are removed first and what remains when anagrammed provides detail about that subject.

Have in mind we went straight to 18th century from 8th century by artificially adding 1000 years.

<https://youtu.be/dt8o4WBGYBQ>

woodcut of the 1833 Leonid

Although this video has at least validated that 1000 has been added, we need to add +324

YOUTUBE.COM

A Proof We Live In 1021. Not 2021.

1021+324 = 1,345. 2022 = 1346

All this time the 1000 of Otto's New Age which he announced July 3rd 1676, thereby losing "324" years, has actually been 323½ years, not 324 nor 324½. And there has been notes from Nostradamus regarding the "+23" years to be considered when repairing the "TERCENTENARY". The "three centuries not published again". Such a red herring when he sits three books on his desk in view (Centuries 7 the remainder, Centuries 11 and 12)... that were never allowed (by the likes of Wikidpedia) to become public – not until these Hidden Texts were found. The reason for the subterfuge is simple. The latter quatrains in Centuries 7 speak of the "ANUBIS SEAT" stargate and the eleventh and twelfth Centuries of Sixaines speak of the Crocodilian, which we now know is the Custodian Messsiah.

This 323½ needs to be repaid, added back when the 1000 tacked on by pope Gregor is deleted. In essence 675½. At this point I need to explain that the realization of all this was my waking thought today (26.Dec.24) when it should have hit me while writing up the FOUR HOUR VHS TAPE. You will notice they lie, too. The white arrow.

Reading left to right | **CUSTODIANS**

they will be allowed to consume	humans on earth will be expected	to breed and grow to capacity	which will be shared with our world's
to continue existing as a species	this parallel history will suggest that mass	extinction events	are the result of man made folly
the last visit by the custodians was	approximately in the year 1346	and it lasted seven years	And this visit which will not be
met with any	resistance	will be in the year 2028	and will run for one full calendar

Where the video says "and it lasted seven years" keep in mind that the alphabet agencies admit they alter times, events, details, and even past tense so it seems. Because what we have here is this video telling us they came in 1346/2022, that they will be here for 7 years until 2028 ("approximately" for all of 2022/1346 to end of 2028/into 2029/1353 so when they say "years" they will be speaking of thirteen month years – hence "approximately"). You will recall Eisenhower's grand daughter always saying the term of the E.T. "treaty" is seven years, this is where she is getting it from. This is not accurate. The term of the treaty is every ninth year for ratification. Hence the movie title PLAN NINE FROM OUTER SPACE which was treaty Nine in 2014. Ninth from 1933. Nine times nine years from 1933 is 2014.

This image, when we can ever see it crispy clear – is a portrait by Albrecht Dürer, painted 1527/ Even Sylvie Ivanova had to battle to be able to read the date. A lower case "i" with full stop/period before and after. The "i" stands for iulus-julius. This portrait is "The King's Matter" (Encycl. Britt.) which is Katharine of Aragon and the two Boleyn sisters, which in 1527 was the King's Matter indeed! Henry 8th. This is the information on which I base the Charlemagne lies, painted by Dürer.

- **Support or Resistance:** A horizontal line can mark a level of support or resistance, indicating a price ceiling or floor. If the price touches or breaks through this line, it may signal a potential trend reversal or continuation.
- **Range-bound trading:** A horizontal line can define a trading range, where the price oscillates between a specific high and low. This can be a sign of consolidation or a lack of clear direction.

2. **Mathematics:** In mathematics, a horizontal line above a date or expression can represent:

- **Vinculum:** A vinculum is a horizontal line used to group mathematical expressions, indicating a composite or repeated value. For example, in a decimal expansion, a vinculum above a repeating sequence indicates its periodic nature.

JEFFERSONIAN – SMITHSONIAN [i839] BIGGEST LIARS OF THEM ALL

TO all those people handing their DNA over to gubberment bodies - one can see why (no such thing as a free lunch) – after watching this//

yes, they are alive today and about to rise again - beginning 50 to 60 degrees north latitudes. One needs to ask why do c i a helicopters turn up every time a child is stolen at a national park? Were National Parks made national (1909) BECAUSE these giants live under? How did the military leaders know to train ordinary soldiers where and how to shoot at a giant?

I would question if they did "put themselves" into stasis. Recall the Bible saying "for one thousand years put into the pit [in iron/Mars – would that be hibernation?]"

Maybe that is why our calendars were made over to have two TYPES OF "phantom" "ages", the 324 years lost by prince Otto in a panic making his ice age millennium - and the edict sent TO GREECE from pope Innocent TO ADD 1000...(to bring the end of his sentence of the one in irons closer) by removing the "i" for lulus prefix & replacing it with an arabic font "1"

yes, the Raphaim are the "third peoples of the AntEchrist" which Nostradamus wrote FIVE times in his Epistle to Henri. Then in two quatrains he also spelled it ANTEchriфт (BEFORE Christ)...also Q8 77 line 1 and in Q10 66 line 3. The ONLY place in the bible ANTIchriфт appears, is John, who spoke of them. We do have a new 13 month year.
it began Oct. 2013.
Because the new orbit is elliptical, the
longest, shortest and equal dark to day
dates are no longer where they were.
The year 2024 does not begin until next
March. The year 2025 does not begin for
another 13 months after that
And the new 2026 not for another 13
months after that.
@Jon Large.

Helen Parks OK. Now you got me
having to read up bunch of stuff that
I hadn't planned on reading. Lol. Real
busy right now. But when I get the
chance, I'll start researching what
you said once again what you said
on the outside sounds sort of crazy.
But I have known over these years
every time you sell something that
sounds outlandish and crazy. it
turns out to be true. But this I can't
even begin to follow right now.

From: Anichka Fletcher anichka47@yahoo.co.uk

Oh do not despair, you are cited by russian audience in the know quite a bit, when i mentioned that i knew the author, yourself, they were like 'hell wow!' And also them being mages, knew this was no coincidence. There is a group i found quite interesting, Ley lines and earth mysteries, lots of pictures there posted that you might find exciting...as to the content, it is still mind boggling for me, as it seems my small brain cannot take in most information in the texts, if only very slowly. Overall, people in the know that i talk to, all looking for a potential pick up, in case 🐞 hits the fan.
